

KYCWARE

KYCWARE OFFERS

an advanced Know Your Customer “KYC” software solution for onboarding & verifying users, AML screening, & regulatory compliance

Onboard users via a KYC smartphone app branded & integrated to your company

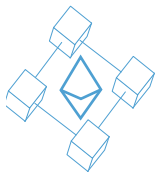

- Native apps made available on Apple App Store and Google Play Store for user-friendly experience
- Rapid Deployment of your KYC platform on high-availability Microsoft Azure cloud servers

Verify user identities with best-of-breed cryptographic security software

- Advanced ID, document & identity verification technology includes anti-gaming features, MRZ scanner and liveness detection
- Automated AML screening against proprietary database of global sanctions, Politically Exposed Persons (PEPs) and watchlists

Manage submissions through your turnkey hosted web portal

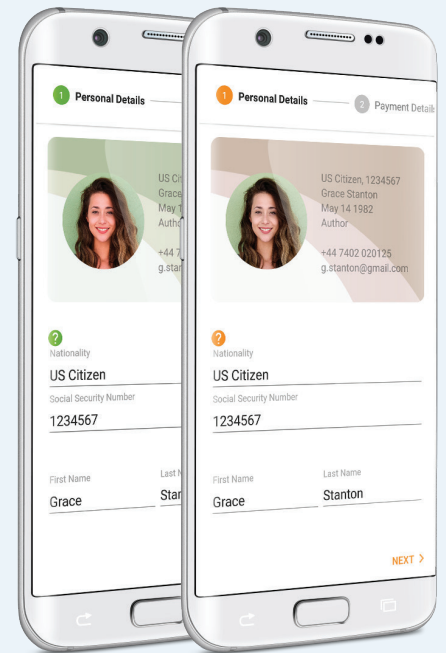

- Review KYC submissions, streamline the approval/rejection process, and submit verification requests to users
- All KYC/ AML transactions are logged with a permanent unalterable hash on the Ethereum blockchain

Comply with global KYC regulations and mandates

- Assure users that sensitive data is managed solely by your company, not outsourced to third-parties
- App questions and forms auto-adjust according to user entries to meet compliance needs across jurisdictions
