TOKENETICS

Generate your digital securities via an ERC-20 smart contract suited to your business model and regulatory requirements

- Fund your business with Reg D or Reg A+
- Apply additional features via “peered” smart contracts built alongside the primary-issuance smart contract
- Compliantly issue, distribute and trade tokenized securities

KYCWARE

Onboard and verify investors through a high-tech, high-touch smartphone app branded to your company

- User friendly app made available on Apple App Store and Google Play
- Advanced ID, document & identity verification technology
- No third-party access to sensitive data
- Anti-tamper and plausible deniability

CUSTODYWARE

Enable your Transfer Agent to compliantly custody and manage investor’s digital securities

- TA maintains “Good Control Location” as preferred by regulators
- Maintain up-to-date shareholder listings
- Issue dividends & interest payments
- Move tokens from custody to regulated ATS for compliant secondary trading

AMLCOP

Screen users against a proprietary database of global sanctions, politically exposed persons (PEPs), and watchlists

- Regulator-aligned due diligence process
- Increase accuracy, reduce false positives
- SEC Rule 17a-4(f) Compliant
- Immutable records of all transactions
